

<b>Paper Nr.</b>	<b>Title of the paper</b>	<b>Authors</b>
12001	Machine and process interaction by mechatronics	F. Bleicher, J. Bernreiter
12002	Advancing Machine tools and technology	B. Denkena, F. Flöter, L. Hülsemeyer
12083	The Method for Online Monitoring of Stability during Milling	T. Horný, R. Bičíšková, P. Fojtů, P. Zeman
12043	Universal approach for machine tool testing independent of axis configuration	C. Brecher, J. Flore, H. Schwenke, C. Wenzel
12044	Investigation of machining related impact to the generated surface of work pieces due to High-Speed hard Milling	M. Stolorz, M. Busch, B. Gelissen, F. Klocke
12042	Efficient calibration of five-axis machine tools based on a systematic error budget analysis	C. Brecher, J. Flore, C. Wenzel
12047	Device for electric power measurement at machine tools	P. Blecha, R. Huzlík, P. Houška, M. Holub
12041	High precision, fast and flexible calibration of robots and large multi-axis machine tools	C. Brecher, J. Flore, S. Haag, C. Wenzel
12048	Simulation of linear axis with ball screw and permanent magnet synchronous machine	R. Huzlík, M. Holub, F. Bradáč, P. Blecha
12049	Analysis of the Unconventional Application of Rotating Systems of Machine Tools	Z. Kolíbal, J. Marek
12040	Development of the tool contact stiffness monitoring method in buffing with the intelligent polishing machine	K.Igarashi, Y.Kakinuma, T.Arai, E.Uchishiba, M.Murakami, T.Sagara
12052	Fundamental investigations on Conventional milling in the overall context of a Laser-assisted Process	R. Wiedenmann, M.F. Zaeh
12053	Inherent thermal error compensation of machine tool structures with graded mineral casting	R. Neugebauer, W.-G. Drossel, S. Ihlenfeldt, S. Nestmann, C. Richter
12039	Introduction TO an in-production machine tool energy efficiency test	K. Ikkala, P.H. Andersson
12054	An offline programming system for robot-based die quenching	Yang Jianzhong, Zhou Jinqiang, Gong Xiumei
12038	Modular hydrostatic axes systems	C. Brecher, A. Sobotka, M. Klatte, M. Fritz
12037	Innovative calculation method for ultrasonic systems and its application for an ultrasonic device to machine optical freeform-surfaces with diamond	Sophia Hannig, Christian Brecher, Christian Wenzel
12057	Milling and quality monitoring of sheet metal edges in continuous flow production	Prof. Dr.-Ing. E. Abele, S. Schmidt, E. Turan, B. Jalizi, F. Haehn
12036	Controller commissioning based on a new identification method of parametric models for cascaded servo drive systems	S. Hofmann, A. Hellmich, H. Schlegel, W.-G. Drossel
12060	Spindle and Cooling Circuit Thermal Integrated Model	B. Denkena, D. Dahlmann
12061	Fully satisfying machine tools development process	P. Blecha, L. Novotný, R. Blecha
12062	Value analysis used in machine tool development process	J. Dobřický, L. Novotný
12070	Refinement of the stability diagram for the choice of cutting conditions	P. Fojtů, P. Souček
12072	Advanced compensation of thermally induced displacements of machine tools based on transfer functions	M. Mareš, O. Horejš, P. Kohút
12073	Machine tool heat transfer FEA and experimental identification of convective heat transfer	O. Horejš, P. Kohút, M. Mareš
12075	Technology optimization of PPS/C composite milling using Taguchi method	P. Masek, P. Zeman, P. Kolar
12035	Integrated Machine Control Strategy for Fast Tool Ultra Precision Machining	C. Brecher, D. Lindemann, C. Wenzel
12034	Information systém for tool management in manufacturing systems	Lubomír Vašek, Marek Hlaváček
12033	Machine integrated, robust direct measuring devices for the compensation of thermal deformation	C. Brecher, J. Flore, M. Klatte, C. Wenzel

12032	<b>Development of magnetically levitated high speed spindles and possibilities they give for the interaction with the milling process</b>	L. Uriarte, I. Etxaniz, I. Iturbe
12031	<b>Dynamic thermal error modeling of a built-in permanent magnet motor high-speed spindle</b>	Jen-Wei Hong, Jenq-Shyong Chen
12077	<b>Minimization of cogging effect in machine tool rotational feed drive axes</b>	J. Moravec
12078	<b>New Concept of Rotary Table for Multi-Profession Machining Center</b>	O. Kubera, L. Novotny, J. Hovorka, P. Souček
12082	<b>An integrated approach to the development of machine tool structural parts</b>	P. Kolar, J. Smolik, M. Sulitka, J. Šindler, J. Hovorka
12029	<b>Study of AE Signals for Ball Screw Pretension on Feed Drive Table</b>	Shean-Juinn Chiou, Ming-Chyuan Lu, Shih-Chen Kao
12028	<b>Development of Spindle Vibration Based Tool Breakage Monitoring System for Micro Milling</b>	Y. Huang, M. Lu, C. Huang, S. Chiou
12027	<b>Damping behavior of spindle bearings</b>	C. Brecher, S. Bäumlner, R. Habermann
12084	<b>Measurement and modeling of cutting process energy efficiency</b>	O. Máca, P. Zeman, T. Holkup
12023	<b>Cutting force monitoring in ball screw driven stage by inner sensor fusion</b>	H. Miyazaki, R. Kumakura, Y. Kakinuma
12086	<b>Issue concerning identification of Machine Tools Thermal Behavior according to ISO 230-3 standard</b>	J. Hornych
12087	<b>Coupled model of the machine tool motion axis with A multi-stage tooth gear system</b>	M. Sulitka, Zd. Neusser, J. Veselý
12088	<b>Analysis of finishing NC programs from two different CAM systems</b>	P. Vavruska
12024	<b>Real time Simulation Approach for the Machine Tool Design and Error compensation</b>	K. M. Litwinski, R. Peters, L. Overmeyer, B. Denkena
12089	<b>High Speed Pneumatic Spindle Online Vibration Control for Resonance Avoidance in Non-loaded State</b>	P. Konečný
12090	<b>Final inspection procedure for machine tool spindles</b>	D. Burian, P. Chvojka, J. Drobílek, M. Janota
12022	<b>Air jet assisted machining of difficult-to-machine materials</b>	T. Obikawa, T. Ohno, H. Takahashi, Y. Ishikawa
12021	<b>A Study on the Influence of the Spindle Characteristic to the Cutting Stability of Machine Tool</b>	J. L. Chen, K. M. Lai
12019	<b>Machining Performance Improvement Based on Chatter Identification</b>	Jhy-Cherng Tsai, Shen-Jhy Wang, Fa-Jhy Chen
12017	<b>Analysis and Re-design of Structure Dynamics and Tolarances for the Ram of a Double-column Machine Tool</b>	Jhy-Cherng Tsai, Shean-Juinn Chiou, Shang-Rung Wu, Kung-Gian Huang
12014	<b>Revealing the 5-axes machine tool contouring performance with the R-test</b>	G.H.J. Florussen, H.A.M. Spaan
12013	<b>Model updating of machine tools</b>	R. Neugebauer, M. Kolouch, M. Richter, V. Wittstock, S. N. Saha
12012	<b>Improving Accuracy of cooperating robots by prediction of the igps-signal-stability</b>	S. Quinders, R. Schmitt, R. Müller, P. Jatzkowski, A. Duffe
12005	<b>New concepts of structures and control of machine tools</b>	M. Valasek
12004	<b>Energy Optimized Machining Processes with Advanced Models and Simulation Tools</b>	J. Leopold, T. D. Marusich
12002	<b>Advancing Machine tools and technology</b>	B. Denkena, F. Flöter, L. Hülsemeyer
12011	<b>Application of tools on the field of composites</b>	Ing. P. Čáp, Ing. P. Pokorný
