

Title of the paper	Authors	page
1 Evolutionary Algorithm to Solve Trajectory Planning Problem, with Robot Dynamics Considerations	Fares Abu-Dakka, Francisco Valero, Jose Luis Suñer, Vicente Mata	6
2 Robot Trajectory Planning by Points and Tangent lines	Sergio Savino, Cesare Rossi	6
3 Multi Camera Mechatronic Monitoring System	Karol Dobrovodský, Pavel Andris	7
4 Mobile robot omnidirectional undercarriages for of robots cooperation	Branislav Lacko	7
5 Measurement Method of Feed-Rate Between a Tool and a Workpiece	Petr Vavruška, Petr Konečný	8
6 Automated assembly and disassembly of components whit the use of a Pick and Place manipulator	Radovan Holubek, Roman Ružarovský, and Karol Velíšek	8
7 Handling device design for glass products positioning	Angela Javorová, Karol Velíšek	9
8 Design of the Cartesian robot for assembly and disassembly process	Roman Ružarovský, Radovan Holubek, Karol Velíšek	9
9 Electromagnetic method for distance measurement on MEMS structures	Lukas Marsalka, Rene Hartansky	10
10 Kinematic Redundancy Optimization of Serial and Parallel Robot Trajectories for 3D Surface Generation	Alexandru Dumitrache, Khaled Assad Arrouk, Belhassen-Chedli Bouzgarrou, Theodor Borangiu, Grigore Gogu	10
11 Automatic Sliding Door Software Design based on Finite State Machine	Franc Hanzlič, Karel Jezernik, Slavko Cehner	11
12 Implementation of the Control Algorithm for Haptic-based Teleoperation on a Field Programmable Gate Array (FPGA)	Marko Franc, Aleš Hace	11
13 Small-size Robotic Tools with Force Sensing	Jaroslav Hricko and Štefan Havlík	12
14 Robotic manipulation system with adaptive effector reflecting different steel plate diffraction analyzed by machine vision algorithms	Ondrej Staš, Marián Tolnay, Dušan Kravec, Michal Bachratý, Michal Jedinák	12
15 Computer aided design of unconventional bio-robotic gripper	Martin Jakubčík, Darina Kumičáková	13
16 Constrained Mapping of Movement from Human to Robot: Robot Squatting	Andrej Gams, Tadej Petrič, Jan Babič, Leon Žlajpah	13
17 Human-robot cooperative rope turning using nonlinear oscillators	Tadej Petrič, Andrej Gams, Leon Žlajpah	14
18 Generation, generalization and adaptation of motion primitives	Miha Deniša, Bojan Nemec, Aleš Ude	14
19 INS Aided Carrier Phase Differential GPS System for Precise Navigation	Laszlo Kis, Bela Lantos	15
20 A Polymorph Particle Filter for State Estimation used by a Visual Observer	Markus Bader, Markus Vincze	15
21 Increases in the Radial Capacity of Vacuum Gripping Elements	Marcel Horák, František Novotný	16
22 The RCC mini-gripper for precise assembly	Štefan Havlík, Jaroslav Hricko	16
23 Detection of Flat Glass Shapes Using Its Reflection	Vlastimil Hotař	17
24 Developing Water Loss Prevention In-pipe Robot System	Luis A. Mateos, Markus Vincze	17
25 Real-time foveation system based on dense 2.5D data	Robert Schwarz, Peter Einramhof, Markus Vincze	18
26 Kinematically redundant robotized cell for machining application	Kevin Subrin, Laurent Sabourin, Grigore Gogu, Youcef Mezouar	18
27 The Design of Training Delta Robot Mechanical Subsystem	Viera Poppeová, Rudolf Rejda, Juraj Uriček, Vladimír Bulej	19
29 Control and collision avoidance for two Kuka LWR robots operated with the Kinect sensor	Matjaž Ogrinc, Tadej Petrič, Nejc Likar, Andrej Gams, Aleš Ude	20
30 Ontology and Data Fusion in Automation Technique	Michal Šir, Vaclav Kaczmarczyk, Ivo Vesely, Petr Fiedler	20
31 DELTA - robot with parallel kinematics	Michal Holub, Miroslav Opl, Jan Pavlík, Zdeněk Kolíbal	21
32 Formation Control of Ground Vehicles Using Multi-Body Approach	Bela Lantos, Gyorgy Max	21
33 Continuous educations in mechatronics and alternative technologies	Andreja Rojko, Karel Jezernik	22
34 On Performance Evaluation of 3D Scene Reconstruction Systems	Tiberiu T. Cocias, Sorin M. Grigorescu, Florin Moldoveanu	22
35 An Active Stereo Vision Control System Based on PTZ Cameras for Robust Robotic Perception	Gigel Macesanu, Sorin Mihai Grigorescu, Florin Moldoveanu	23
37 Effect of measuring instruments on measurements of insulation resistance and polarization index rated by the high-voltage rotating machines	Josef Pavlík	24
38 Ratio Methods Confrontation of Dissolved Gas Analysis	Martin Ministr, Miloš Hammer, Jakub Ertl, Ondřej Janda	24
39 Failure Probability Prediction of Power Oil Transformers	Jakub Ertl, Miloš Hammer, Martin Ministr, Ondřej Janda	25
40 Mechatronic Design of a Humanoid Robot	Siavash Dezfooli, Peter Kopacek	25

41	Construction and Experimental Simulation of a Tethered MEMS-Based 3 DOF Silicon Micro Robot	Matteo Verotti, Francesco Cappa, Rocco Crescenzi, Nicola P. Belfiore, Marco Balucani	26
42	High-speed communication protocol emulates virtual linkage for robot cooperation	Florin Daniel Anton, Silvia Anton and Theodor Borangiu	26
44	Multifunctional Rover Leg for Lunar Operation	Rita Ambu, Costantino Falchi, Andrea Manuello Bertetto	27
45	A Saffron Flower Harvesting and Spice Separation System	Andrea Manuello Bertetto, Roberto Ricciu	28
46	Requirements and synthesis of a special purpose manipulator	Anton Ruzic	28
47	Inverted pendulum analysis under diverse nonlinear control methodologies	Antonio Valle	29
48	Modular Reconfigurable Anthropomorphic Gripper with Three Fingers for Robots-Design, Prototype and Simulation	Catalin Moldovan, Ionel Staretu	29
49	The adjustable end effector for industrial robots	Jiří Toman, Vladimír Hubík, Vladislav Singule, Radim Blecha	30
50	Cooperative navigation and interaction of human and multirobot systems	Joan Saez-Pons, Amir Naghsh, Leonardo Nomdedeu	30
51	Application of Fuzzy Logic in Power Oil Transformers Diagnostics	Ondřej Janda, Miloš Hammer, Jakub Ertl, Martin Ministr	31
52	Adaptive Neuro-Fuzzy Inference System for Power Oil Transformer Diagnostics	Ondřej Janda, Miloš Hammer, Martin Ministr, Jakub Ertl	31
54	The era of massive use of robots	Mikuláš Hajduk	32
